

Abhishek Shakya

Front-End Developer

Dallu , Kathmandu • 9808534310 • abhishekshakya9898@gmail.com

- Self-taught developer interested in learning about web technology.
- Hardworking and fast learner.

EXPERIENCE

Web developer(MERN) intern

Remote

Travel Details

Sep, 2022

During the internship, I worked with the the UI/UX designer to developed full front-end of a website. I developed the full responsive front-end of the website using React js. I worked in a team and also suggested the UI for the website. I also got the chance to grab the knowledge of current trends. I also got to learn about the backend and developed the server using Express js.

Additionally, I explored Next JS and its advantages over traditional React applications, including server-side rendering and improved SEO. I successfully connected the frontend to the backend API using Axios, ensuring seamless data exchange.

Frontend Designer

lalitpur

Miracle Interface

Feb, 2023 - Present

Developing high fidelity, functional , pixel perfect and responsive prototype from the design in figma and abobe XD. Collaborating with backend developer to develop beautiful layout and UIs. Through this role, I developed skills in:

- Converting design prototypes into functional websites
- Implementing accessibility features
- Advanced CSS animations
- Collaboration with backend teams and UI implementation in Laravel
- State management and data communication between components
- Developing reusable components with SOC principles
- API integration and error handling
- Authentication using JWT tokens
